Summary

Web developer and frontend-focused fullstack engineer with production experience in React, TypeScript, Node.js, and MongoDB, building enterprise interfaces and multi-tenant systems with reusable UI patterns and type-safe contracts.

Delivers work through an organized, collaborative workflow that combines GitHub Projects, a custom PMS tool, CI/CD, Jest testing, and AI-assisted scaffolding with Claude Opus, Codex, and Gemini Pro 3.

Brings practical experience translating requirements into responsive web screens, prototypes, and production-ready interfaces across education, hotel management, ERP, and IoT products.

Experience

Uzaro Solutions Technology Inc.

Technology Developer | Quezon City | Nov 2024 - Present

- ? Developed production-grade frontend interfaces and reusable component libraries using React and TypeScript, establishing shared design patterns and type-safe contracts adopted across 8+ company-wide projects.
- ? Drove sprint delivery across 6+ concurrent platform builds in IoT, LMS, HMS, HRIS, Inventory, and Order Management using GitHub Projects and a custom-built PMS in an Agile environment, accelerating delivery through AI-assisted prototyping and scaffolding with Claude Opus, Codex, and Gemini Pro 3.
- ? Designed backend data models in MongoDB and Prisma that aligned frontend-backend contracts, managed CI/CD pipelines via GitHub Actions with Firebase deployment, and authored Jest unit and integration tests that reduced post-release bug reports by about 25%.
- ? Integrated smart door locks, switch and outlet relays, and IoT gateways via REST APIs into a centralized React dashboard, enabling real-time device control and monitoring for 50+ connected endpoints with sub-500ms response latency.

IPSolutions Inc.

IT Intern | Pasig City | Mar 2024 - May 2024

- ? Designed and delivered 3 responsive client-facing landing pages including the company's main website using HTML, CSS, and Bootstrap, with each page passing cross-browser QA on first review during the 3-month internship.
- ? Collaborated with the development team to implement features following SDLC best practices, gaining foundational experience in Git-based versioning and team delivery workflows.

Selected Projects

ALMA (Alternative Learning Management App)

Multi-tenant LMS

- ? Architected a multi-tenant LMS serving 3 organizational tenants with role-based access for admins, instructors, and 200+ student accounts, implementing tenant-isolated data schemas and JWT-based authentication.
- ? Built an assessment engine with automatic quiz scoring, grade computation, and analytics dashboards tracking learner performance across courses, reducing manual grading workload for instructors.
- ? Developed attendance tracking and gradebook modules used by 15+ instructors across 40+ classes, enabling real-time class record management and automated academic report generation per tenant.

HMS Reservation System

Hotel management prototype

- ? Built a multi-tenant hotel management system enabling organizations to manage rooms, pricing, users, and reservations with tenant-isolated data architecture.
- ? Designed and implemented core booking functionality including room type configuration, dynamic pricing rules, and full reservation lifecycle management from search to checkout.

ERP Platform Suite (Uzaro Solutions)

Enterprise product modules

- ? Architected and developed interconnected ERP modules as part of a multi-tenant enterprise platform.
- ? Built an HRIS module covering payroll, time management, onboarding, attendance, and personnel records, handling 6,000+ employee records with role-scoped visibility across tenants.
- ? Developed a GS1-compliant inventory system with barcode and SKU identification, real-time stock tracking, and low-stock alerting, reducing manual stock audit time and enabling automated procurement triggers.

Technical Skills

Frontend:

React, TypeScript, Next.js, Tailwind CSS, Bootstrap, HTML/CSS, Zustand, TanStack Query, Socket.io

Project Management:

GitHub Projects, Custom PMS Tool, Agile/Scrum

AI-Augmented Workflow:

Claude Opus 4.6 (architecture, guidelines, prompt engineering), Codex (backend logic, code generation), Google Stitch / Gemini Pro 3 (UI/UX prototyping)

Backend:

Node.js, Express, REST API Design, JWT Authentication, Zod

Testing:

Jest, Playwright

DevOps & Deployment:

Git, GitHub, GitHub Actions (CI/CD), Firebase Hosting, Docker

Databases & ORM:

MongoDB, MySQL, Prisma ORM

Languages:

TypeScript, JavaScript, Python, Java, C++, PHP

Domain Experience:

IoT Smart Devices, Education/LMS, Hotel Management, ERP (HRIS, Inventory/GS1, Order Management, Supply Chain, Project Management)

Education

Biliran Province State University

Naval, Biliran | Bachelor of Science in Computer Science | With Honors | Graduated May 2024

? Algolympics Champion - 1st Place, campus-wide algorithm programming contest (2nd Year).

? Relevant coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Object-Oriented Programming.
